Restor-A-Finish®

Restor-A-Finish

Refinisher

Restor-A-Finish closes the gap between basic scratch cover products and stripping/refinishing products.

- WILL NOT DISSOLVE or remove existing finish
- Restor-A-Finish penetrates through an existing finish to restore both color and luster
- Restor-A-Finish should be used to remove blemishes, heat rings, watermarks and light scratches
- Restor-A-Finish is restoring an EXISTING finish in one easy step
- MINUTES to complete projects
- DISSOLVES and removes existing finish
- A refinisher does not restore the finish color but removes the entire finish
- A refinisher should be used to remove a wood finish that is so severely damaged that it cannot be restored
- A new finish needs to be applied after using a refinisher
- HOURS to complete projects
